

# THIERRY DE MONTBRIAL

President and Founder of the World Policy Conference

The World Policy Conference means working constantly, from early in the morning to late in the evening. Now we are going to have a short presentation by Guillaume Pepy, the Chairman and CEO of SNCF, the French railway company. As you know, today railways extend all over the world and it has become a very modern activity. Guillaume is going to make a short presentation on the stakes of mobility in the world, in the next few years and decades. I am happy to give the floor to Guillaume Pepy and you will only be allowed to have lunch afterwards, if you listen very carefully to his presentation.
