

Allen Mohammadi

Co-fondateur & PDG, Hippogriff

Allen is an inventor and a visionary social entrepreneur who has developed the world's first clinically validated Artificial Intelligence technology for diagnosis of complex diseases including an accurate tool for early diagnosis of heart disease.

As one of the youngest ever candidates, Allen has been honored as “European of the Year 2018” together with other brilliant personalities including President Emmanuel Macron (President of France) and Chancellor Angela Merkel (Chancellor of Germany).

As a value-driven leader and social change-maker, Allen has been selected by the Forbes magazine as one of the top 30 most influential innovators and featured on the prestigious Forbes 30Under30 list. He is also a true entrepreneur who sold his first company already at the age of 15.

Living in different countries and studying in different subjects including engineering, innovation, business, entrepreneurship and public health in some of the best universities in the world have broadened his horizon.

As an innovator, he has demonstrated an extraordinary performance and high ambition. This resulted receiving more than 60 national and international awards including the prestigious Alfred Nobel Diploma, European Youth Award as well as 1st rank among 1000+ innovators worldwide in the Global Innovators Race.

Allen has been mentor to young students on the path to developing their full potential. He is also grand jury member in different national and international competitions including European youth Award.

In recognition of his positive social impact, Allen received the “European Change Award” and was honored as the “young entrepreneurial talent of the year 2016” in Europe which was handed by Commissioner Carlos Moedas, (European Commissioner of Research, Science and Innovation) and Commissioner Tibor Navracsics (European Commissioner of Education, Culture, Youth and Sport).
